Syracuse, NY, Sept. 28, 2018 – WERMA, a pioneer for visual and audible signal devices, will be showing innovative systems for process optimization in manufacturing and also innovative signaling solutions developed for use in food and hygiene areas at PACK EXPO in Chicago from October 14-17, 2018.

SmartMONITOR – the smart MDC alternative

SmartMONITOR is an intelligent and innovative solution to realize a wireless Andon Call-for-Action System in your production facility to easily collect reliable data from machines, systems and manual workstations. Disruptions to the process can be easily indicated by Andon lights. This information is also wirelessly collected and documented to analyze and determine unproductive time and downtime reasons. Response to disruptions and downtime will save time long-term. The wirelessly networked system will also provide a central control station overview of activities and can send e-mails calling for immediate action.

WERMA has the solution: The LED stack light CleanSIGN

WERMA specifically developed and constructed a stack light for use in food and hygiene areas to meet the demanding requirements. Thanks to the compact design, the CleanSIGN doesn't have any uneven surfaces, grooves or joints where dirt could collect and liquids and fluids drain quickly. With an IP67/69k rating, the stack light can be cleaned easily and withstands high pressure and steam cleaning conditions. The LED technology used ensures brightness with a flexible choice of colors for each tier of the stack light and a life duration of up to 50,000 hours. The integrated buzzer provides additional indication and warning.

Meet Udo Skarke, General Manager WERMA USA Inc at PACK EXPO

Come and see us at PACK EXPO in Chicago (East building, booth 8728) and see for yourself our hygienic design signaling solutions and intelligent wireless process optimization systems.

You will also have the opportunity to meet our General Manager of WERMA USA Inc Udo Skarke. Come along and talk to our experts and see our latest products. We are looking forward to your visit.

About WERMA

WERMA Signaltechnik is one of the world's leading companies for visual and audible signal devices. As a global company based in southwestern Germany, we are pioneers in technology innovation. Our signal devices ensure safe working environments and efficient processes with machines, systems, manufacturing areas and buildings. For over 65 years WERMA has been developing and manufacturing electrical devices. Our products signal people, machines, and computers.

We manufacture our own plastic components, electronics, tools, devices and systems all of which are guaranteed to be "Made in Germany." By using the benefits of lean production processes and intelligent automation, our manufacturing processes are both flexible and quick.

WERMA offers retrofit wireless monitoring systems for machines, manual workstations and logistic workstations.
